Science 科學

Land and Water - Students will investigate interactions between land and water. Students will learn how runoff causes stream formation; how groundwater forms; how soil is eroded, transported, and deposited; and how water shapes the land. Students will also learn about seasonal weather patterns, and the formation, affects, and aftermath of tornadoes, hurricanes, tsunamis, etc. on the environment. Students use inquiry investigations to discover the effects of human interaction with land and water such as pollution, dams, landscapes, etc.
